TECHNICAL PROJECTS

Life Note, Project Link, Documentation   **July 2022 – October 2022**
Skills – Node.js, MongoDB, Mongoose, Passport.js, JavaScript, jQuery, Bootstrap
- An app for users to create notes on the things they need to remember.
- Built using a Node.js and MongoDB back end to handle data, and a Bootstrap front end.
- Relatively complex relational database schema, making use of different table relationships.

Small Fry Thai, Project Link   **October 2022 – January 2023**
Skills – HTML, CSS, JavaScript, JQuery, Bootstrap
- A brochure site for a fictional Thai food truck in the Chippewa Valley.
- The site explains the menu and the upcoming 2023 schedule.
- Users can send in requests for catering on the site using Netlify.

Cursor Adventure, Project Link   **November 2021 – December 2021**
Skills - HTML, CSS, JavaScript, JQuery, Bootstrap
- Text based adventure game created for our capstone project at CVTC.
- Multi-level survival game where players must find supplies to progress.
- Bootstrap was used for the front end, JavaScript and jQuery were used to progress to other levels.

EMPLOYMENT HISTORY

Records and Forms Management Specialist, Wisconsin Department of Justice   **June 2016 – Present**

Performs professional analyst duties supporting the Department's goals of government transparency and managing the public release of investigative case files for the Wisconsin Department of Justice – Division of Criminal Investigation, Special Operations Bureau, and the Office of Open Government. Works collaboratively with Special Agents of the Division of Criminal Investigation (DCI) to identify and potentially remove sensitive information, which could jeopardize future law enforcement operations and identify victims or witnesses of violent crimes. Cooperates with and assists local, state, and federal agencies that are involved in DCI investigations. Compiles and prepares Officer Involved Critical Incident investigative files for future public release, and redacts those files utilizing multiple software and in compliance with the Wisconsin Public Records Law.

- Responsible for production and public release of multiple Officer Involved Critical Incident investigative files for release to the public.
- Utilizing ShareFile, implemented the release of multiple Officer Involved Critical Incidents on the Wisconsin Department of Justice's Critical Incident web page.
- Created and managed the "Officer Involved Critical Incidents Map" which describes each critical incident DCI has investigated.
- Submitted multiple high value grant applications, with a successful application funding the purchase of cold weather gear to promote workplace safety.
  - Attended Grant Writing training course provided by the U.S. Attorney's Office -Eastern District of Wisconsin on October 12, 2017.
- Led training of DCI records personnel in redaction of video and audio files using Adobe Premier Pro.
